# **Captuvo SL22/42 ChargeBase**

---

## **Quick Start Guide**

## **Overview**

The ChargeBase is a 4-slot charging cradle that can power four sleds and charge their batteries in four hours. If the Apple® iPod touch® / Apple iPhone is inserted into the sled, the iPod touch / iPhone will also be charged.

-  We recommend use of Honeywell peripherals, power cables, and power adapters. Use of any non-Honeywell peripherals, cables, or power adapters may cause damage not covered by the warranty.

*Note: Due to the availability of different models, your ChargeBase may look slightly different from the illustrations included in this document.*

## **Unpacking the ChargeBase**

Open the shipping box and inspect the package to see that the following standard items are included:

- One ChargeBase (Model: SL-CB-C)
- One power supply
- One power cord
- Quick Start Guide

These items are needed to operate the ChargeBase. If any items are missing or anything appears to be damaged, contact your Customer Account Representative. Keep the original packaging in case you need to return the ChargeBase for service or to store the ChargeBase while not in use.

## **Convenient Storage**

Since charging terminates when the battery has a full charge, the ChargeBase a safe and convenient storage receptacle for your Captuvo SL42 sled.

## **Front Panel**

Sled Wells (Qty. 4)

## **Back Panel**

## **Power**

The terminal requires 12 Volts DC input for battery charging; the power adapter on the power cable converts the voltage from the power source to 12 volts DC. Use only a UL Listed power supply, which has been qualified by Honeywell with output rated at 12VDC and 5A amps with the device.

Honeywell recommends that you leave the ChargeBase connected to its power source at all times, so that it is always ready to use.

## ***Connecting Power to the ChargeBase***

1. Plug the A/C power cord into the power adapter.
2. Plug the power connector cable into the power connector on the back panel of the ChargeBase.
3. Plug the A/C power cord into a standard wall outlet.

The ChargeBase is ready to begin charging the sled/iPod touch.

## ***Charging the Battery***

1. Install the main battery pack in the terminal.
2. Verify the ChargeBase has power.
3. Slide the sled into one of the four wells. Charging begins immediately if required by the sled or the iPod touch. If the iPod touch is installed in the sled, the battery icon at the top of the screen indicates that it is charging. The sled and the iPod touch charge simultaneously and completely depleted batteries will be charged in four hours.

 Ensure all components are dry prior to mating sleds/batteries with peripheral devices. Mating wet components may cause damage not covered by the warranty.

### ***FCC Part 15 Subpart B Class B***

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or television technician for help.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet helpful: "Something About Interference." This is available at FCC local regional offices. Honeywell is not responsible for any radio or television interference caused by unauthorized modifications of this equipment or the substitution or attachment of connecting cables and equipment other than those specified by Honeywell. The correction is the responsibility of the user.

Use only shielded data cables with this system. This unit has been tested with cables less than 3 meters. Cables greater than 3 meters may not meet class B performance.

Caution: Any changes or modifications made to this equipment not expressly approved by Honeywell may void the FCC authorization to operate this equipment.

## ***Canada***

### ***Industry Canada ICES-003***

This Class B digital apparatus complies with Canadian ICES-003. Operation is subject to the following conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

### ***Conformité à la réglementation canadienne***

Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada. Son fonctionnement est assujetti aux conditions suivantes :

1. Cet appareil ne doit pas causer de brouillage préjudiciable.
2. Cet appareil doit pouvoir accepter tout brouillage reçu, y compris le brouillage pouvant causer un fonctionnement indésirable.
